CONWAY Electric MTB full suspension "Xyron S 2.0" (#1)

Description

Our "XYRON S 2.0" marks the entry into the Bosch MTB world! Thanks to 160 mm of suspension travel, powerful support and reliable components, you are perfectly equipped for anything you set your mind to!

The highlight: the Battery is firmly integrated into the closed down tube - this saves a lot of weight, simplifies handling and makes the bike generally quieter on the trails thanks to fewer parts! The geometry is balanced and responsive - for precise handling and good climbing characteristics.

The Shimano 11-speed drivetrain ensures smooth gear changes, while the TEKRO 4-piston brakes with 203 mm discs give you full control at all times. With electronic Pushing Help, a permissible total weight of 140 kg and well thought-out equipment, our "Xyron S 2.0" is a real all-round talent.
