CONWAY Electric MTB full suspension "Xyron ST 10.0" (#2)

Description

Do you want a bike that can do everything - and looks really good at the same time? The "Xyron ST 10.0" is our top model in the ST version and, with its Bosch mid-drive motor and 800 Wh Battery, will easily get you through long tours and steep climbs. The combination of 150 mm suspension travel, 29" wheels and a lightweight carbon frame ensures plenty of grip and precise handling.

Thanks to the new, electronic Shimano XT Di2 gearing, you now benefit from an even better riding experience: thanks to functions such as "Auto shift" or "free shift", you can concentrate fully on the trail while the gearing does the rest! And if you hit the ground hard, the Impact Recovery function even protects your rear derailleurs.

The sporty geometry places you centrally above the bike and gives you plenty of pressure on the Front Wheel - giving you maximum control on technical or steep terrain. And best of all, the handling remains super agile even in the roughest terrain. And with the tool mount under the top tube and the hidden kickstand mount on the rear triangle, you're also clever off the trail!
