

Product data sheet

CONWAY Electric MTB full suspension "Xyron ST 4.0" (#2)

Description

The "Xyron ST 4.0 Alu" makes it possible! With its powerful Bosch mid-motor and huge 800 Wh Battery, you can literally fly over the trails. Even steep climbs are no longer a problem - thanks to 100 Nm of torque, the powerful Bosch engine pushes you up everywhere. With 150 mm front and rear suspension travel, the fully simply swallows up everything the trail throws at you. The large 29" wheels roll smoothly over roots and rocks, while the Shimano "Deore" 12-speed gear system always has the perfect gear for you.

Your riding position is central and controlled - ideal for technical descents and steep climbs. The tool mount under the top tube and the hidden kickstand mount on the rear triangle? Practical without sacrificing style. The electronic Pushing Help helps you when things aren't rolling. And all of this on a stable aluminum frame with a permissible total weight of 140 kg.
